Alhasan Abdulrazzaq

APPLICATION ANALYST | HEALTHCARE IT

Profile

Healthcare IT professional pairing 2+ years as a daily Epic end user in a hospital Emergency Department with 2 years of hands-on IT support and a B.S. in Information Technology. Experienced in troubleshooting applications, hardware, and networks; documenting systems, requirements, and workflows; and translating technical issues into plain language for clinical and front-line staff. Brings a user's-eye view of how Endeavor Health's registration and patient-facing workflows run day to day. Bilingual in English and Arabic.

WORK EXPERIENCE

Patient Access Representative, Endeavor Health (Emergency Dept.), Skokie

FEBRUARY 2024 — PRESENT

- Use Epic daily to register ED patients, verify insurance, and maintain accurate demographic and financial records across Epic and payer systems in a high-volume, fast-paced environment
- Coordinate patient flow with nurses, physicians, and clinical teams, giving firsthand insight into how EHR workflows affect care delivery and the patient experience
- Enter, update, and validate sensitive patient data (PHI) with strict HIPAA compliance; manage multi-line phones and triage urgent inquiries
- Process copays, deductibles, and outstanding balances with consistent accuracy

Information Technology Specialist, Smoke Station, Urbana

APRIL 2021 — DECEMBER 2022

- Sole IT support for 2 retail locations and 6 staff; owned every issue from intake through troubleshooting, resolution, and follow-up for Clover POS, Windows workstations, and LAN/WAN connectivity
- Diagnosed and resolved hardware, software, and application incidents, minimizing downtime for business-critical sales operations
- Configured network settings, file sharing, and user permissions; implemented access control policies and data protection measures
- Trained non-technical staff on POS software and basic troubleshooting, explaining issues in plain language to reduce recurring tickets; monitored system performance proactively

ACADEMIC PROJECTS

- **Systems Analysis & Design — IT Asset Management System.** Produced a project charter, requirements document with four swim-lane process maps, and a system design with HTML wireframes, network topology, and role-based access (RBAC, SSO + 2FA).
- **Capstone — Stock Trading System (in progress).** Three-person team building a client/server trading platform with an admin role; deliverables include a Systems Analysis & Design document and a tracked project plan.
- **Enterprise Network Design.** Built a three-LAN internetwork in Cisco Packet Tracer (DHCP, NAT, ACLs, VoIP) and documented it with a security addendum aligned to NIST CSF 2.0.

EDUCATION

B.S. in Information Technology, Arizona State University, Tempe

2026
